

Technical Datasheet: Roof Cover RC-100

Type: Wood Plastic Composites
Weight: 3.8 Kg Each Long Meter
Polymer base: PVC (Poly Vinyl Chloride)
ASTM Standards:

ASTM G154-12	UV Index Delta E: 2.32
ASTM D638-10	Tensile Strength Avg: 18.5 Mpa
ASTM D570-98	Water Absorption 2Hrs: 1.15% and 24Hrs: 4.09
ASTM E 289-04	Linear Thermal Expansion 20-50 Celsius $4.6 \times 10^{-5} 1/K$
ASTM D6109-13	Flexural Strength: 29.8 MPa
ASTM D6110-77	Falling Test Weight: 1 Kg Height : 1500mm Result: Passed

Note: The values in tests been on material properties not the profile

Afra Profile Plast Co.

About Afra Profile Plast Co.

The company produces top quality of Wood Plastic Composite with 10 years experience. It also, provides variety of profiles, that can suit to different designs by highest expertise and advanced formula in manufacturing.

Overview of Wood Plast

Wood Plastic Composites (WPC) profiles are products look and feel like woods and made from the woods with distinct additives and polymer under special circumstances. In other words, additives been used to improve mechanical properties, and features of these products are resistant against UV lights, fire, fungus, pest, and water, that makes to sustain in outdoor environment. On the other hand, regular wood can not resist or, need expensive maintenance with constant care in outdoors, which Wood Plastic Composites do not require that much care, attention, and expenses.

About Roof Cover RC-100

The new generation of villa houses needs profiles that, beautifies the houses. The Roof Cover profile is a new product that, with its exceptional design, speeds up the installation and quick completion of projects. Since Wood Plast is a product that is made without using toxic materials such as glue, it does not emit any toxic gas under the sunlight and also prevents the passage of high heat into the houses. Soon, this product will be greatly welcomed in the construction or renovation of houses.
